Insurance groups (1-50) are an indication only, please consult your insurance company for further details.

CO₂ figures, P11D values, BIK% and MRRP pricing shown above are for a standard vehicle without any additional optional equipment. CO₂ figures are used to calculate Vehicle Excise Duty (VED) for the first registration of the vehicle and BIK%. The addition of optional extras could increase the certified CO₂ emission output. This in turn may affect the amount of VED payable upon registration, and, for company car drivers, the amount of Benefit in Kind (BIK) tax payable.

For further information on CO₂ and pricing for vehicles with optional equipment, please visit <https://www.citroen.co.uk/configurator.html>

* Figures shown are for comparison purposes and should only be compared to the fuel consumption and CO₂ values of other cars tested to the same technical standard. The fuel consumption achieved, and CO₂ produced, in real world conditions will depend upon a number of factors including, but not limited to: the accessories fitted (pre and post registration); variations in weather; driving styles and vehicle load.

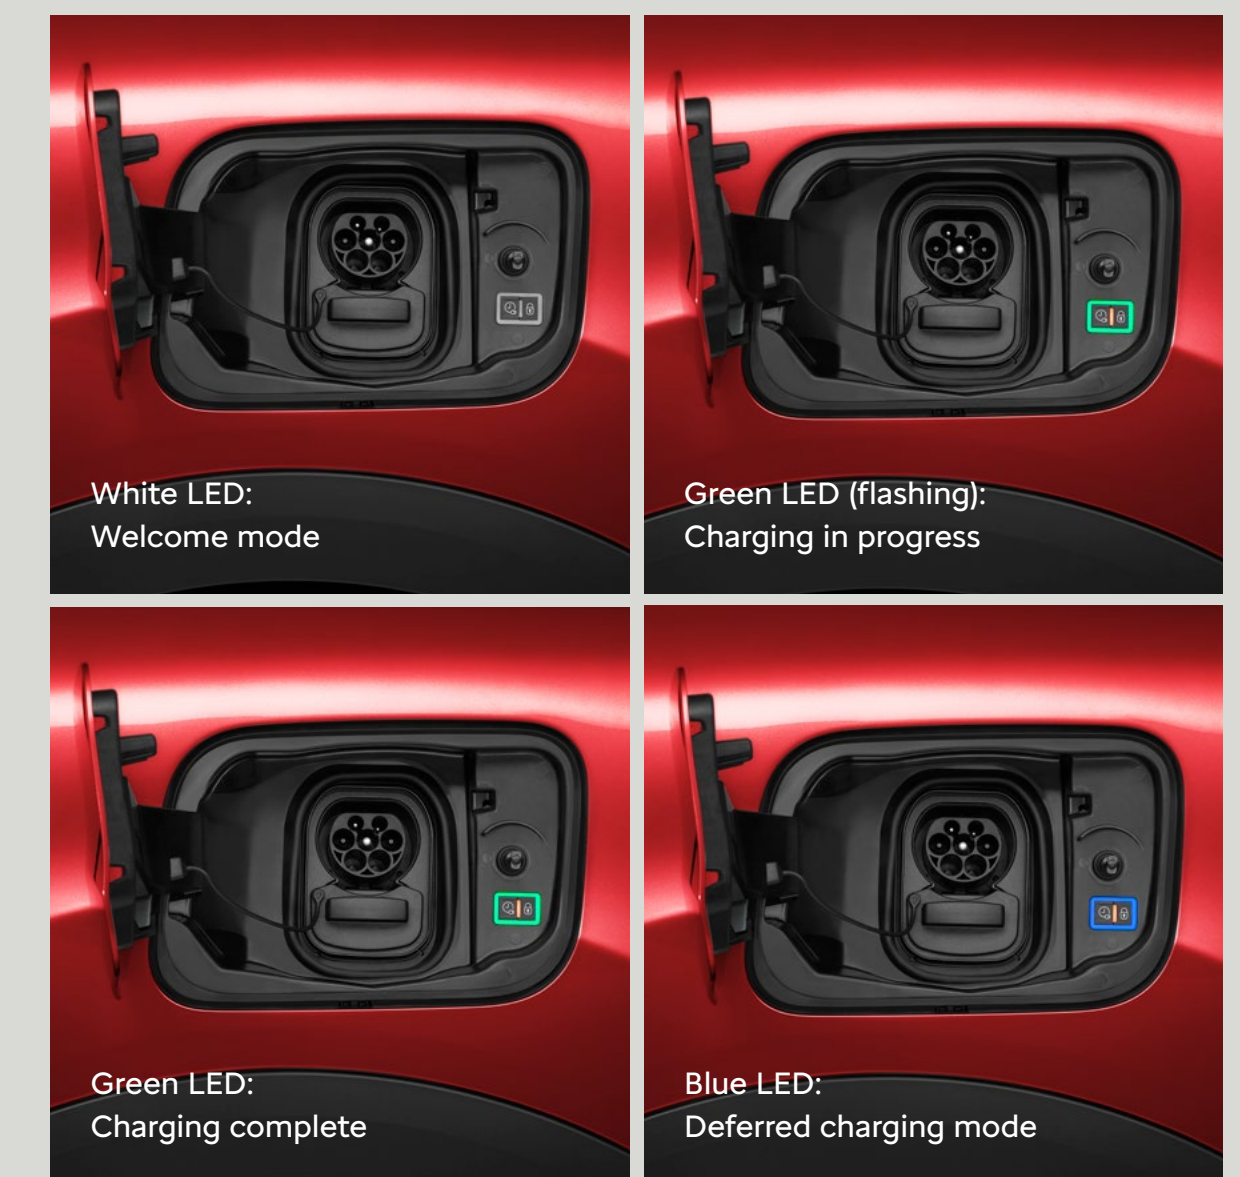

The WLTP (Worldwide Harmonised Light Vehicles Test Procedure) is used to measure fuel consumption and CO₂ figures.

* 'On the Road' MRRP includes registration plates and delivery to retailer (including VAT), 12 months' Vehicle Excise Duty and new vehicle registration fee of £55. Excludes fuel and insurance.

All information and prices correct at time of publication, but are subject to change at any time without prior notice (which may occur as a result of, but not limited to, any changes in legislation and/or any changes by the Government). Please see our Prices and Specifications brochures or contact your local Citroën retailer for the most up-to-date prices and specification details for all models.

Ease of charging

Battery charging at home, work or at a public charging station is intuitive and easy thanks to indicator lamps on the charging flap which lets you monitor progress.

NEW CITROËN ë-C4 X & C4 X

All prices are inclusive of VAT.

Options

• Standard equipment

Some options may change CO₂ emissions, please check with your local retailer.

Safety Pack Plus without Highway Driver Assist or Adaptive Cruise Control				- £270
Electric charging options				
11 kW three-phase onboard charger - offers faster charging only where three-phase power is available ¹	£300		£300	£300

Highway Driver Assist

This semi-autonomous driving system combines the Adaptive Cruise Control with Stop & Go function and a system which keeps the vehicle in its lane.

¹ Offers faster charging only where three-phase power is available. We do not recommend this option unless you intend to charge your ë-C4 X primarily from a source connected to three-phase power (unlikely if a home charge point). Using this charger in conjunction with a single-phase power source will not offer any improvement in charging time over the 7 kW onboard charger.
